Forecast for Friday 08 Jan 2021

Weather: Low cloud will affect the area for much of the day, with outbreaks of snow, persistent at times, giving some accumulations. Any brighter breaks likely to be in the west during the first part of the morning.

Chance of cloud free mountain/hill tops above 600m: 10%. 20-30% in the west during the first couple of daylight hours.

Visibility: Good at low levels during dry spells but poor at height with cloud bases 400-500m through much of the day.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cold, particularly where we have lying snow. This also causing slippery conditions.

Recent rainfall: measured at Neuadd: altitude 353m
